HotSheet Explained (using Waukesha data)

DS() CB() ES(41) SQ() VP()

Upper right corner indicates equipment

The top box comes directly from WEC data easily obtained via the State of Wisconsin. **Anyone with a finger can click to download the data, no charge.**

In-Person Early Voting: **76,962** Mail-in: **111,153** Others: **1051**
Counted by Hand: **11,711** Optical Scan: **251,495** Touch Screen: **2**
Questionable Data Estimator: **18%**

Source: StatBandit.com

Means 46 registrants who voted had the same phone num. Next most common was 44..

Total Active Registrants: **308,749** Inactive: **230,854** Total: **539,603**

Top 6 – Same phone number: **46, 44, 37, 34, 33, 33**

Registrants at Ethnos360 Hartwell Avenue: **745**

Registrants with no phone number: **262,015**

Registrants with 0 as their phone number: **15,635**

1918 Active Registrants: **8,026** Inactive: **15,011** 1918 Total: **23,037**

A super tiny school with an enrollment of ~ 200 had 745 who voted. **Questions to ask:** Over what period of time and why would students register to vote from a temporary address?

The WEC voter roll database was first launched in 2006. They imported data from some unknown place. **Questions to ask:** Why do we have so many registrants who registered in 1918 still able to vote? What % of these voters are dead? Can a dead person be made active?

The lower box comes directly from WEC voter roll data easily obtained via the State of Wisconsin. **Anyone with \$12,500 can obtain a copy of this data.**

This is why ANY FFPCA project without large funding is ludicrous

THE HOTSHEET WAS CREATED TO HELP PEOPLE KNOW THEIR DATA SO TO GENERATE QUESTIONS AND FIND ANSWERS
